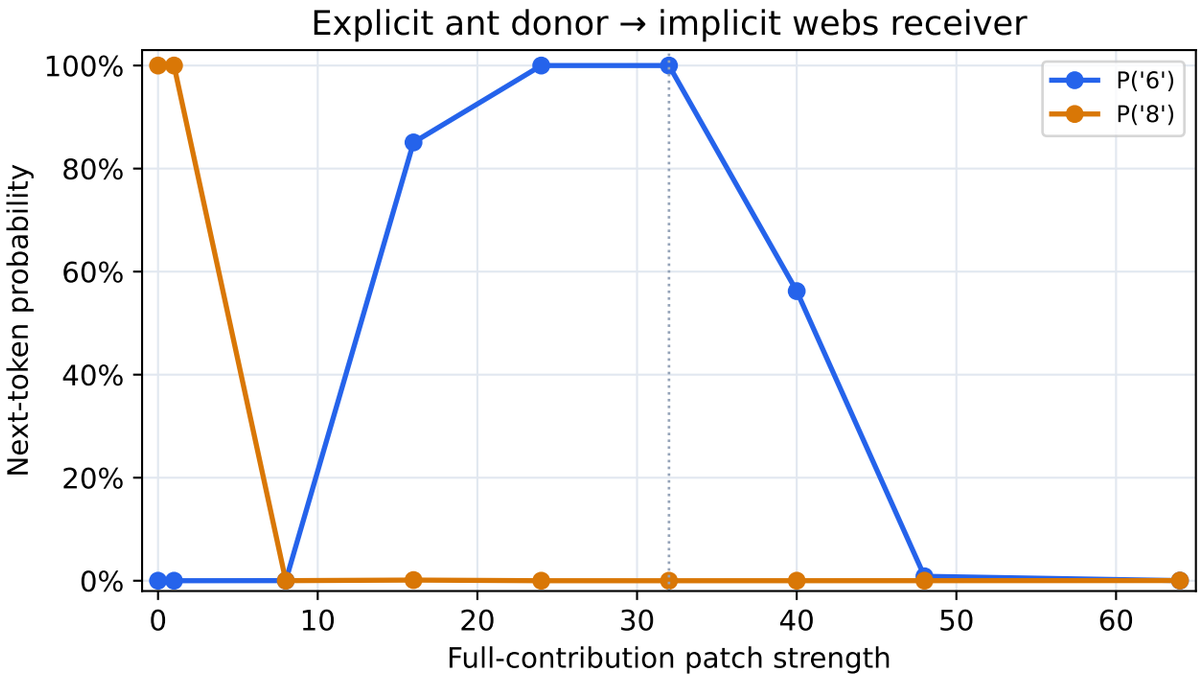
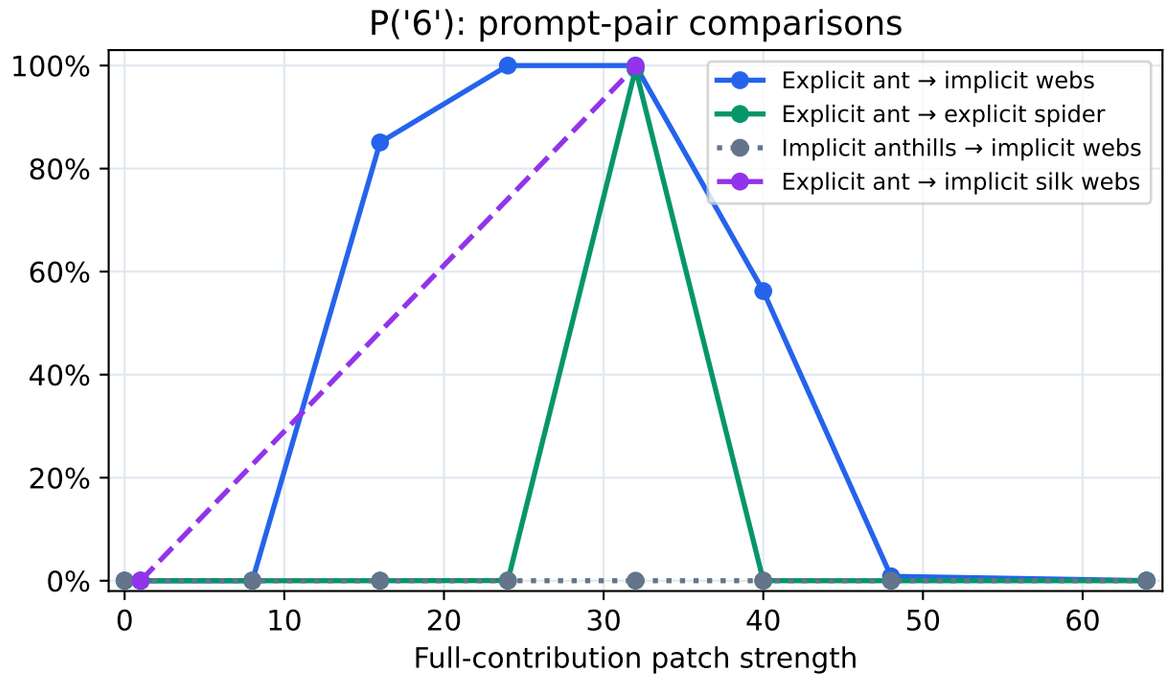
L3–T2309: explicit ant donor → implicit spider question

Small Invertebrate and Insect Token Gate · rank 32 · Qwen3-4B · attention unfrozen

Donor: " ant" (token 8) → receiver: " webs" (token 12), at original layer-3 MLP output.





At 32×: P('6') = 99.999976%, P('8') = 0.000021%; generated answer: '6'.

Silk-webs rephrasing uses only prespecified strengths; lines connect measured points, not additional runs.

One MOLT and one token edited per trial. These answer probabilities do not establish semantic concept replacement.
